**Part B. CV SUMMARY (max. 3500 characters, including spaces)**

José Antonio Encinar is associate professor (Profesor Titular de Universidad) of Biochemistry and Molecular Biology at the Department of Biochemistry and Molecular Biology, Miguel Hernández de Elche University. He obtained his doctorate (Biochemistry-Neuroscience) in 1998 (Instituto de Neurociencias de Alicante). He has been awarded the extraordinary doctoral prize in the Neurosciences program. He has completed two postdoctoral stays in Paris (Institut de Biologie Physico-Chimique. Prof. Philippe Devaux) and Heidelberg (European Molecular Biology Laboratory. Prof. Luis Serrano). His current research interests are focused on the use of computational approaches for the development of compounds that modulate the activity of proteins of biomedical interest (cancer, obesity, diabetes). The use of molecular modeling, docking and dynamics techniques allows high-throughput screening of chemical libraries for the selection of candidate compounds to modulate the activity of proteins of interest, which are then tested on the bench. To date, he has co-published 89 primary and review articles. All articles published to date are available in PDF format at: <https://shaker.umh.es/publications/>

He is currently developing his research activity at the Institute for Research, Development and Innovation in Health Biotechnology of Elche (IDiBE). As a professor, Dr. Encinar has participated in multiple teaching activities for the Bachelor degrees of Biochemistry, Biotechnology and Food Science and Technology (EPSO-UMH), Courses of the IDiBE's Doctoral Program in Health Biotechnology.
